Spring 2016

Introduction to Human Epidemiology

SPH 102: 3 units (undergrad) CRN: 64024

GE Science & Engineering Credit

IOR: Lorena Garcia, DrPH, MPH

Epidemiology is the study of the distribution and determinants of disease and injury in populations. In this course students will learn and understand the practice of epidemiology as it relates to human populations. The content of this introductory course is fundamental to the Public Health minor and a required core course.

*Its major objective is to familiarize the student with how epidemiology contributes to:*

1. The understanding of the causes and natural history of diseases of all kinds,
2. The control of disease in human populations, and
